SOFTWARE DEVELOPER

Experienced Java developer with over **2+ years** of expertise in Java web technologies, encompassing Java, J2EE, Spring Boot, and MySQL. Demonstrated success in crafting scalable, high-performance web applications. Eager to tackle challenging opportunities, driving impactful solutions to propel organizational growth. Seeking a challenging opportunity to leverage my expertise, drive impactful solutions, and propel organizational growth to new heights.

EXPERIENCE

Software Developer
Wipro Limited

March 2022 – Present
Greater Noida

Project : Grameenphone Ltd

Environment : Java, Spring Boot, Hibernate, MySQL

- Grameenphone leads telecommunications in Bangladesh, holding 80% market share through collaboration with Telenor and Grameen Telecom Corporation.
- Specialized as a Backend Developer in **Java, Spring Boot, Rest API**, and **MySQL** technologies within the AD team.
- Led bug resolution and provided unwavering support for seamless functionality of the Customer Order Management System module.
- Achieved a 95% satisfaction rate by ensuring effective bug resolution and support, enhancing customer satisfaction.
- Adeptly handled deployment and testing of new features using JBoss admin, WinSCP, Soap UI, and **Postman**.
- Improved application performance by 20% through robust functionality and efficiency of API testing.
- Actively participated in the support team, maintaining uninterrupted application operation with uptime at 99.9%.

Project : Employee Management System

Environment : Java, Spring Boot, Spring Data JPA, MySQL

- It's Spring Boot project for managing employees. The project structure might include various endpoints, controllers, services, and other components typical of a RESTful API implementation.
- REST API Design: Developed a highly performant and scalable RESTful API using Spring Boot, adhering to MVC architecture for effective data management and processing.
- Endpoint Implementation: Created and managed various endpoints, including **GET, POST, PATCH, and DELETE** operations, providing comprehensive functionality for employee management.
- Controller Management: Engineered controllers to handle API requests efficiently, ensuring seamless communication between clients and the server.
- Service Layer Optimization: Optimized the service layer for improved performance, ensuring quick and reliable execution of operations.
- Performance Improvements: Achieved remarkable improvements in data processing efficiency through careful design and optimization, resulting in lightning-fast operations across the API.

EDUCATION

Rayat Bahara Institute of Engineering and Nanotechnology
Bachelor of Technology

CGPA – 7.5
Jun 2017 - Aug 2021

TECHNICAL SKILLS

Backend Technologies : Proficient in **Core Java** delivering efficient and optimized code
: Expertise in **J2EE, Spring, Spring MVC, Spring Boot, Maven, JDBC and RESTful Web Services**,
Databases : Proficient in **MySQL** optimizing data storage.
API Design : Extensive knowledge of **REST** enabling efficient and scalable API development.
ORM : Hands-on experience with **Hibernate** ensuring seamless interaction between Java objects and databases.
